

ISSABELA B. MORA

Entry-Level Web Developer | Software QA Tester

General Trias, Cavite, Philippines | 0991-831-9445 | ibmora00@gmail.com

[linkedin.com/in/issabela-mora](https://www.linkedin.com/in/issabela-mora) | kangkang-portfolio.vercel.app

PROFESSIONAL SUMMARY

Computer Science graduate and entry-level Web Developer / QA Tester with hands-on experience in full-stack web development, software testing, and systems integration. Backend experience in JavaScript and Node.js, including REST API integration, hardware-device communication, and SQL/XAMPP database support. Skilled in manual testing, bug tracking, debugging, and Git/GitHub version control. Comfortable with Agile/Scrum collaboration and using AI tools (ChatGPT, Claude) to speed up coding and documentation.

KEY SKILLS

- Languages & Web: JavaScript, React.js, HTML, CSS, Node.js, REST API integration, Responsive Web Development
- Testing & QA: Manual Software Testing, Test Case Execution, Bug Tracking & Debugging, System Performance Analysis, UAT Support
- Tools & Platforms: Git, GitHub, VS Code, Figma, XAMPP/SQL, Vercel, Wix
- Productivity: Microsoft Office, Google Workspace, Technical Documentation Writing
- Methods: Agile/Scrum Collaboration, Cross-Functional Teamwork, Systems Integration

WORK / INTERNSHIP EXPERIENCE

Web Developer Intern — Pasay Taft Tourist Dev Inc. (Urban Travellers Hotel)

February 2026 – May 2026 (300 hours)

- Collaborated on system design for a fully deployed employee attendance and timekeeping system, from concept through deployment.
- Built backend functionality in JavaScript and Node.js, integrating ZKTeco SDK/libraries for real-time communication with a biometric device serving ~70 employees.
- Tested system performance and identified, tracked, and resolved all reported bugs, improving reliability and uptime.
- Used AI-assisted tools (ChatGPT, Claude) to speed up coding and debugging.

ACADEMIC & PERSONAL PROJECTS

VISILIYS — Web-Based Visitor & License Plate Management System with Facial Recognition, OCR & GPS

Group Capstone Project — Role: System Designer & Documentation Lead

- Designed the system concept and architecture for a multi-feature platform integrating facial recognition, OCR, and GPS, including visitor classification logic — developed, delivered, and defended as a capstone project.
- Collaborated with the team's UI/UX designer on Figma mockups and wireframes to guide development.
- Led technical documentation and version control across a 4-member team throughout the SDLC.

Personal Portfolio Website

Personal Project — Designer & Developer

- Designed the layout in Figma, then built and deployed a responsive portfolio using React.js, hosted live on Vercel.
- Used AI-assisted tools (Claude) to speed up coding and troubleshooting.

EDUCATION

Bachelor of Science in Computer Science

Philippine Christian University – Dasmariñas | Graduated June 2026
